Magda Ahmed

Front-end Web Developer

Alexandria

Summary

Front-end web developer experienced in building UI with WordPress and creating fully functional WordPress websites, I like both the design aspect because it helps me unleash my creative side while the technical aspect helps me to build logic and solve problems so I find myself enjoying doing both.

Working in IT makes it impossible to get enough or stop learning, so I'll always consider myself a full-time student.

Experience

Voktech Egypt

Web Development Intern

February 2021 - May 2021 (4 months)

remotely

- Worked on WordPress websites (E-commerce, Business Websites, Multi-lingual websites..etc).
- used page builders(Ex: Elementor, WPbakery..etc) and plugins(translation, seasonal customization..etc).
- used CSS3 for some customization.
- held meetings with clients to understand their needs & their website's functionality.
- handled clients (edits and queries) till their website goes live.

Moneyleek
